Petrol Engine

Petrol engine (British English) or gasoline engine (American English) is an internal combustion engine with spark-ignition, designed to run on petrol (gasoline) and similar volatile fuels.. In most petrol engines, the fuel and air are usually pre-mixed before compression (although some modern petrol engines now use cylinder-direct petrol injection).

Petrol engine - Wikipedia

The newer generation petrol engines use sophisticated 'Fuel-Injection' technology (just like diesel engines) with an 'Engine Management System' for improved performance and lower emissions. However, it still uses the spark-plug for igniting the petrol which was the case in the earlier generation petrol engines.
